

# Great Streets Construction Update – Rehab Begins

Construction progresses on the Great Streets Program -- the City's approach to restoring and preserving our streets. Pavement treatments are divided into two categories: *maintenance* and *rehabilitation*. Last month, the Local Street Maintenance Project was completed by Pavement Coatings Co. This month, we are beginning the Local Street Rehabilitation Project. The contractor is All American Asphalt. Pavement rehabilitation is necessary for streets that are in poor condition and typically involves patching, grinding down old pavement and installing a thick layer of asphalt concrete. Motorists and pedestrians are reminded to stay alert, follow posted signs and "slow for the cone" in the vicinity of all construction activity.

Check out the map of streets for the rehabilitation project at [www.sangabrielcity.com](http://www.sangabrielcity.com). For more information, please contact Algis Marciuska at [amarcuska@sgch.org](mailto:amarcuska@sgch.org) or 626.308.2806, ext. 4632.
